### 3.4 (c)

#### OUTDOOR HOUSING FACILITIES.

(c) Construction. Building surfaces in contact with animals in outdoor housing facilities must be impervious to moisture. Metal barrels, cars, refrigerators or freezers, and the like must not be used as shelter structures. The floors of outdoor housing facilities may be of compacted earth, absorbent bedding, sand, gravel, or grass, and must be replaced if there are any prevalent odors, diseases, insects, pests, or vermin. All surfaces must be maintained on a regular basis. Surfaces of outdoor housing facilities--including houses, dens, etc.--that cannot be readily cleaned and sanitized, must be replaced when worn or soiled.

Building surfaces in contact with animal need to be impervious to moisture. The inside wood surfaces of the shelters of the two outdoor shelter kennels need to be sealed or painted. This will help in cleaning and sanitizing of the shelters. This will also help dogs to be in good health and best care given. Affects 19 dogs.

Correct by 06-01-2008

### 3.6 (a) (1)

#### PRIMARY ENCLOSURES.

Primary enclosures for dogs and cats must meet the following minimum requirements:

(a) General requirements.

(1) Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair.

Enclosures must be kept in good repair and structurally sound. The steel door on the 2nd pen from the north of the middle outdoor kennel needs the door replaced or repaired where the bottom part of the frame is rusted through. Affects 1 dog.
